

SEVA LEDGER

Table Schema Reference — Admin, Coordinator & Volunteer Dashboards

This reference documents the underlying data tables behind every tab in the three role-based dashboards, followed by the full field-level schema for each core table.

Core Data Entities

Seven tables back the entire app. All but Profile Extra live in one shared ledger document; Profile Extra is stored per-volunteer and kept private to that volunteer.

students — Volunteers

Field	Type	Description
id	string (PK)	Unique volunteer identifier
name	string	Full name
dept	string	Department — CSE / ECE / Mechanical / Civil
year	integer	Year of study (1–4)

staffList — Coordinators

Field	Type	Description
id	string (PK)	Unique coordinator identifier
name	string	Full name
dept	string	Department the coordinator belongs to

admins — Program Admins

Field	Type	Description
id	string (PK)	Unique admin identifier
name	string	Full name
title	string	Designation, e.g. NSS Program Officer

activities — Drives

Field	Type	Description
id	string (PK)	Unique drive identifier
title	string	Drive name
category	enum	One of 7 drive categories (Blood Donation, Tree Plantation, etc.)

Field	Type	Description
date	date	Scheduled date
location	string	Venue / location
description	text	Full description shown to volunteers
maxVolunteers	integer	Capacity
hours	number	Hours credited per volunteer who completes it
status	enum	pending_approval / published / rejected / completed
createdBy	string (FK → staffList.id)	Coordinator who proposed the drive
dept	string	Owning department
registered	array<string> (FK → students.id)	IDs of volunteers registered for the drive

hourLogs — Hour Logs

Field	Type	Description
id	string (PK)	Unique log identifier
studentId	string (FK → students.id)	Volunteer who logged the hours
activityId	string (FK → activities.id)	Drive the hours were logged against
hours	number	Hours claimed
note	text	Volunteer's description of the work done
status	enum	pending / approved / rejected
date	date	Date the log was submitted

notifications — Notifications

Field	Type	Description
id	string (PK)	Unique notification identifier
audience	string	all / admins / staff:<id> / student:<id>
message	text	Notification content
time	datetime	Timestamp
tone	enum	info / success / warn

profileExtra — Volunteer Profile Extra (personal, per-volunteer)

Field	Type	Description
studentId	string (FK → students.id)	Owning volunteer (storage key: profile-extra:<id>)
bio	text	Short personal bio
phone	string	Emergency contact number
interests	string (comma-separated)	Volunteer interest tags

Derived values shown in the UI but not stored as separate tables: MILESTONES (badge thresholds at 20 / 50 / 100 approved hours), memberId (generated as NSS-<ROLE>-<index>), verificationCode (hash-based certificate code), and the Virtual ID barcode (decorative, hash-generated).

Admin Dashboard

Program-office view across every department.

#	Tab	Entities used	Key fields	Operation
1	Overview	activities, hourLogs, students	status, hours, registered (aggregated)	Read
2	Approve Drives	activities, notifications	status, createdBy, title	Read / Write
3	Departments & Staff	staffList, students, activities	dept, name, createdBy	Read
4	Analytics	activities, hourLogs, students	status, hours, date, dept	Read
5	Broadcast	notifications, admins	audience, message, tone	Write

Coordinator Desk

Department-level view for the volunteer running each drive.

#	Tab	Entities used	Key fields	Operation
1	Overview	activities, hourLogs	createdBy, status, registered	Read
2	Propose a Drive	activities, notifications	title, category, date, hours, maxVolunteers	Write
3	Manage Drives	activities	status, createdBy	Read / Write
4	Approve Hours	hourLogs, activities, students, notifications	status, hours, note, studentId	Read / Write
5	Volunteers	students, activities	registered, dept, name	Read

Volunteer Dashboard

The individual volunteer's personal view of their own service record.

#	Tab	Entities used	Key fields	Operation
1	Overview	students, hourLogs, activities	hours (approved), registered	Read
2	Browse Drives	activities	status = published, category, date, maxVolunteers	Read / Write
3	My Logbook	hourLogs, activities	hours, note, activityId	Write
4	Certificates & Batches	hourLogs, students	hours (approved sum), dept, year	Read
5	Image Gallery	activities	status = completed, category, registered	Read
6	Virtual ID	students	name, dept, year, id (→ memberId)	Read
7	Profile	students, profileExtra	name, dept, year, bio, phone, interests	Read / Write

Generated to accompany SevaLedger.jsx — reflects the app's in-memory / window.storage data model as built.
